As a mentor UCL will monitor your engagement on your UCLeXtend platform. In Year 1, your school induction tutor should ensure that you and your mentee have a dedicated time to meet each week. Mentors working with a year 1 ECT should meet weekly with their ECT while a mentor working with a Y2 ECT is required to meet fortnightly.

As a mentor, UCL will monitor your engagement on the UCLeXtend platform throughout the one-year training programme. Your engagement on the programme will determine funding for your school.

The ECTE is founded on the ITTECF and therefore consolidates ECTs' learning from ITT, allowing you and your mentee to tailor a programme that suits their individual developmental needs.

UCL's ECT mentor programme consists of 18 hours, comprising of:

- facilitated training sessions
- independent learning sessions
- mentor meeting preparation.

UCL recognises that mentors are busy professionals and has therefore aimed to achieve the right balance between independent learning and face-to-face training. Over 50% of the mentor training programme is made up of flexible, self-paced online learning. Inspire Learning TSH also offers additional networking and collaborative events throughout the year, enabling you to build relationships with other mentors in your region while benefiting from expert facilitation led by Inspire Learning TSH.

UCL's curriculum centres on the cultivation of professional identity. This includes supporting the development of ECTs' identities as autonomous professionals, as well as developing your identity as a teacher educator and leader.

As a teacher educator, we hope the mentor training programme will deepen your understanding of how early career teachers learn and grow. Many of the skills developed through the programme, such as building relational trust, providing developmental feedback, and managing potentially difficult conversations, are foundational leadership skills. The curriculum also emphasises criticality, supporting both you and your ECT to become critical consumers and producers of research.

UCL's Early Career Teacher Programme (ECTP)

The ECTP recognises that not all ECTs begin in the same place. There are different routes into teaching and varying experiences of ITT. Your ECT may be working either part-time or full-time. Through this programme, ECTs will consolidate their previous learning without spending unnecessary time revisiting areas in which they are already secure. Each module begins with a Module Formative Assessment (MFA). Firstly, ECTs complete a multiple-choice quiz on their knowledge of the framework. This takes approximately 10 minutes to complete on the UCLeXtend platform.

Following the quiz, your first meeting with your ECT at the start of each half term in Year 1 will be the Formative Assessment Meeting (FAM). During this meeting, you will discuss how strong their practice is in the areas covered within the module. You may ask your ECT to bring evidence to the meeting, such as examples of planning or marking, to demonstrate their experience and understanding.

During the meeting, you and your mentee will decide whether they are emerging, embedding, or excelling in relation to the module content. Together, you will then set a learning goal that can be reviewed at the end of the module.

Progress on the ECTP is not formally assessed; however, engagement is monitored by both UCL and the DfE. It is therefore vital that you select "Mark as Done" whenever you complete activities on the platform.

When you see "To Do", this indicates a compulsory element of the course that must be completed, such as module evaluation forms or review meetings. You must also ensure that you attend the training sessions facilitated by Inspire Learning TSH. You will attend one training session in Term 1 and another in Term 2 (details below).

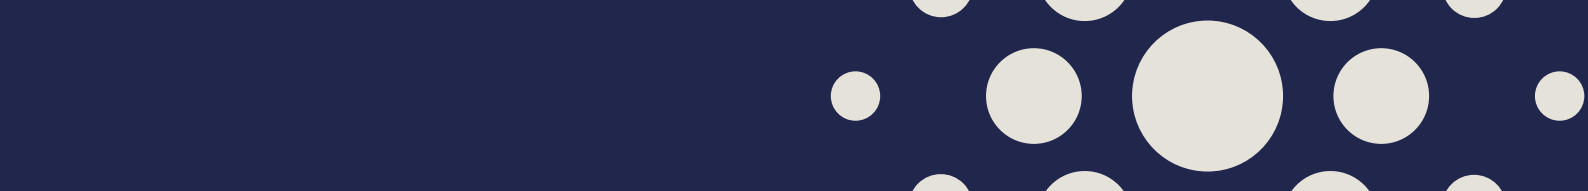

Mentor Training

The order of your training this year will depend on the year group of your ECT. Local Learning Community (LLC) 1 covers all Year 1 modules, while Local Learning Community (LLC) 2 covers the Year 2 modules. We always provide both a Liverpool and a Wirral date option for each training session.

Please sign up to one of the training routes below. You should sign up to two sessions in total.

This two-hour, self-paced induction unit which is compulsory unless you have completed ITT mentor training since 2024.

Self Directed Study Completion Guidance

Mentors are strongly encouraged to complete each self-directed study module alongside the corresponding module being undertaken by their Early Career Teacher (ECT). Following this sequence helps ensure that mentoring conversations are informed by the same evidence, concepts, and programme content at the appropriate point in the ECT's development journey.

However, mentors are not required to complete the modules in a prescribed order. The programme is designed to provide flexibility, and mentors may choose to access and complete modules in any order that best suits their professional needs, interests, and availability.

Where possible, mentors should prioritise staying broadly aligned with their ECT's progress through the programme, as this can enhance the quality of mentoring discussions and enable more timely support. Nevertheless, completion is not restricted by sequence, and mentors may revisit previously completed modules or complete future modules in advance if they wish.

The key expectation is that all required modules are completed and that mentors engage meaningfully with the content to inform their mentoring practice.
